🛡 Military Service: Completed

PROFIL

I have been developing mobile applications with Flutter for four years, and I am currently also working as a Project Manager. In addition to this role, I continue to expand my skills in both backend and frontend development.

EXPERIENCE

Vatansoft 12/2024 – 12/2025

Project Manager And Bussines Analyst

In this role, I manage the entire lifecycle of software projects, oversee task tracking and working hours of developers, and ensure efficient coordination across teams. I analyze user requirements, define software specifications, and create detailed project plans that align business objectives with technical implementation.

The projects I have managed include: Wamessage, Linkgo, Ilksms, CRM Project, Salon Appointment, En Appointment, Salon Management, i-Kelebek, i-Ders, Okulum Mobile Application, and a Voice Analysis-Based Call Tracking Application.

Vatansoft 11/2022 – 05/2024 | Istanbul

Mobile Application Developer

I rebuilt and enhanced 9 mobile applications, significantly improving performance and code quality.

I utilized the GetX package for state management, dependency injection, routing, and localization.

I designed a reusable, service-oriented architecture with layered structures for application themes, network services, storage, and utility components.

I developed custom tools for GitHub branch management and Fastlane configuration, and shared these through Medium articles.

To streamline app updates across multiple projects, I implemented core components such as a Config Service.

Tech stack: Flutter, Dart, Firebase.

Vatansoft 04/2022 – 08/2022 | Istanbul

Intern

As a team, we rebuilt the "Salon Randevu" application from scratch using Flutter and Dart.

I improved application performance and enhanced code maintainability and sustainability.

Technology: Flutter, Dart, Firebase.

PROJECTS

Salon Randevu, En Randevu, Salon Management 01/2024 – 05/2024
3 App

Wamessage Toplu WhatsApp Mesajı 01/2024 – 02/2024
